

# FOOTWEAR

DIADEM

### REBOUND X

#### Roll Guard

Material between midsole and upper on the lateral side of the shoe allows you to spring back quickly when the foot begins to roll outside of the shoe's center of gravity during aggressive lateral cutting motions.

### 360 PERFORMANCE KNIT

#### 4 Way Light Stretch Knit

Allows for superior comfort and flexibility while playing. Allows players of all sizes to fit into this shoe like it was already broken in.

### IMPACT EVA FOAM

#### DUAL EVA Foam In the Heel Construction

Inner soft foam found directly underfoot and provides increased cushioning. Outer foam that encapsulates internal foam is slightly more dense to provide stability, especially in forefoot during lateral cutting motions.

### PRO STANCE X

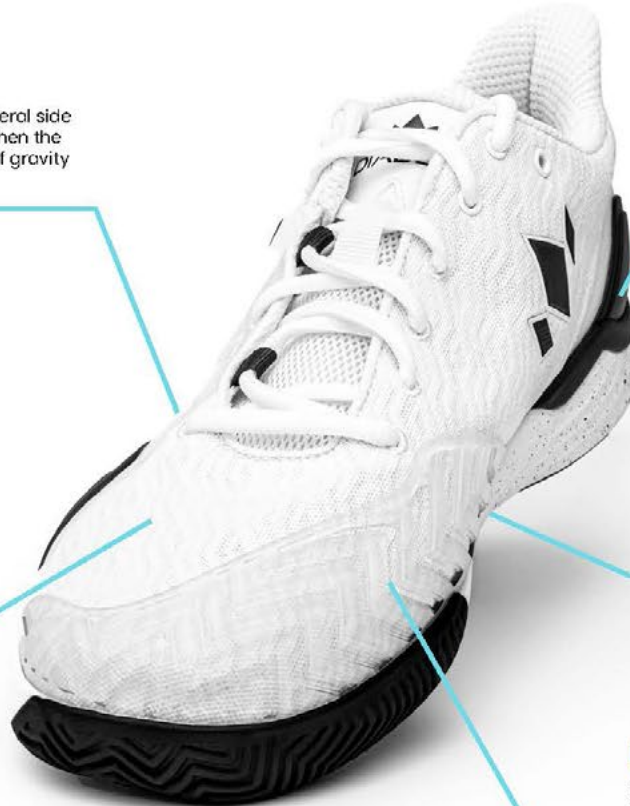

#### Plastic X Shank Inside the Midsole

Provides rigidity and arch stability to the shoe. Helps prevent twisting during the game.

### MAX SHIELD

#### Toe Guard

2mm reinforced TPU toe guards which help provide durability in side to side movement, toe drag, or sudden stops. Soft enough to allow for natural flexing of the foot.
